Prof. Zheng Cui had his PhD in 1988. He went to UK as a Visiting Fellow at Cambridge University in 1989. In 1993, he joined Rutherford Appleton Laboratory of UK and became a Principal Scientist and Director of Microsystem Technology Centre since 1999. While he was working in the UK, he was involved in MEMS and Microsystems technology development. He was the Coordinator of Competence Centre for Microactuators and Non-silicon Microsystems (CCMicro) from 2000 to 2005, which was part of the Europractice Program. In October 2009, he returned to China and setup the Printable Electronics Research Centre, which was then the first and now the leading Centre in the area of flexible and printed electronics in China. He has published over 200 technical papers and 6 books on the subjects of microfabrication, nanofabrication and printed electronics.
